Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

DETAILED ACTION

1. Claims 12-20 are pending. Claims 1-11 have been cancelled.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. Claims 12-20 rejected under 35 U.S.C. 103(a) as being unpatentable over Spaanderman et al. (Spaanderman), U.S. Patent No. 5,325,434 in view of Mizikovsky, U.S. Patent No. 6,839,434.

As per claims 12, 16 and 20:

Spaanderman substantially teaches a method comprising generating a first public key for encrypting a first wireless communication and generating, upon termination of the first wireless communication, a second public key for use in a second wireless communication (8:3-37).

Spaanderman fails to teach the second public key being independent from the first. However, Mizikovsky discloses a method wherein the second generation of keys is based on random numbers, therefore making the second generation of key independent from the first (4:57-5:5).

It would have been obvious to one of ordinary skill in the art at the time of applicant's invention to make the next generation of keys independent from the first because this would inhibit the discovery of the keys by hackers in case an attacker uncovers the first keys (5:20-26).

As per claims 13-15 and 17-19:

Art Unit: 2132

Spaanderman further discloses a method comprising determining whether the second public key has been stored (9:11-31); using the second public key to encrypt the second wireless communication after it has been stored (8:3-37); and generating a third public key to encrypt the second wireless communication if the second public key has not been stored (9:11-31, since the reset button will reset the process and new keys will be generated after 10 failed attempts).

Conclusion

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a).

Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
